

Computer forensic Attorney

What we do

We act as specialist Solicitors and Advocates in information technology and communication systems dispute.

In criminal, civil and arbitration matters, we provide the leverage your team needs to succeed on issues that concern digital evidence.

Our lead Principal Consultant has more than 20 years combined experience in information technology and legal practice. He is a Solicitor, qualified Computer Systems Engineer and Certified computer forensic Investigator.

Our combined expertise in law and technology provides a firm base from which we provide dependable end to end legal IT solutions from case investigation to court room adjudication.

As Attorneys in technical subject matter litigation, we undertake the extraction, analysis and review of digital evidence from computers, Mobile phones and other digital devices.

We formulate and implement strategies for electronic document discovery and management, conduct expert evidence review and undertake the relevant direct examination, cross examination and rebuttal of computer forensic expert witnesses and document custodians.

We work with Solicitors, Barristers, insurance firms, Banks and Judicial officers; providing the required digital forensics expertise and electronic document strategy from pre action protocols to Case management conference and court room advocacy.

If your case (Criminal or Civil) has a shred of Computer or Technology input **Contact us before you proceed.**

One stop – Digital evidence Solutions

As specialist Solicitors, we manage the electronic evidence component of your case from pre trial discovery, digital evidence extraction, analysis and expert report review to case management conference and court room advocacy.

Our combined skills as lawyers and computer forensic engineers provides a complete platform from which we address all your electronic discovery and digital evidence requirements.

Strategic leverage

Our presence in your team, removes the need for a digital forensic expert. Because as lawyers who doubly qualify as digital forensic engineers we are well positioned to advice on the relevance and strategic steps necessary to implement a successful digital evidence discovery and forensic litigation protocol.

Independent laboratory

We maintain our own forensic laboratory, where we review digital evidence and expert witness report. Our independent approach to digital evidence analysis will provide a clear picture of the strength and weakness inherent in any item of digital evidence.
